

## IMAGINE RATIONALE

---

Imagine the future where the obstacles we now face are overcome. What would we want to be able to do again but, also what would we want to differently?

## TIPS

---

Talk to the children about the future and what this is. For younger children this will be about a more immediate future and plans for tomorrow or next week. Encourage children to contribute ideas for session etc. this future thinking helps to generate hope even in younger children and a sense of things moving forwards

Talk about dreams, goals and wishes. Integrate activities around these into curriculum content where feasible to enable children to keep think about the future and what they would like to achieve. This is very important to encourage hopefulness in children and keep them engaged in future thinking

Use wish activities to support pupils imagination and future thinking- examples include making and decorating a wish box that children can put ideas into about things that capture their imagination or wishes for the future

## FURTHER WORK

---

Use video to capture unusual thoughts feelings and ideas from his period. Use music, pictures and stories to inspire children to think about different times and places
